## Professional Summary

Purposeful Planning Engineer with one year of experience in project planning, scheduling, and management within the construction sector. Expert in Primavera P6 with a proven record of delivering projects on time and within budget. Adept at optimizing resource allocation, conducting critical path analysis, and ensuring effective communication with stakeholders. Known for problem-solving, decision-making, and leading teams to achieve project goals.

## Professional Experience

### Planning Engineer

#### Right Vision Company

**Khartoum, Sudan | May 2022 – April 2023**

- Spearheaded the development and maintenance of detailed project schedules, including resource allocation and critical path analysis, leading to a 10% reduction in project delays.
- Monitored project progress, identified potential delays, and implemented risk mitigation strategies, ensuring 95% of projects met deadlines.
- Prepared and presented comprehensive progress reports to stakeholders, enhancing transparency and alignment with project objectives.
- Coordinated cross-functional teams (engineering, procurement, construction) to ensure seamless project execution.
- Utilized Primavera P6 and Excel for effective scheduling and project management.

### Site Engineer

#### Right Vision Company

**Khartoum, Sudan | April 2021 – March 2022**

- Managed the implementation of construction projects from design inception to final delivery, ensuring 100% adherence to project specifications.
- Monitored project progress and aligned it with baseline planning, identifying and addressing any discrepancies.
- Facilitated communication and coordination among engineering teams, workers, and suppliers, resulting in a 20% increase in on-site efficiency.
- Solved technical problems and provided engineering solutions, contributing to the successful completion of projects.
