

PROFILE

BIM Architect with 3 years of experience delivering accurate architectural documentation for large-scale projects. Skilled in preparing LOD 300–400 drawings, Revit-based architectural coordination, and producing high-quality shop drawings in compliance with project BIM standards. Experienced in working closely with multidisciplinary teams to ensure coordinated, clash-free architectural deliverables. Strong proficiency in Revit, AutoCAD, and BIM workflows, with hands-on experience in model coordination, drawing updates based on RFIs, and maintaining project documentation accuracy. Known for attention to detail, adherence to timelines, and effective collaboration within fast-paced project environments.

PROFESSIONAL EXPERIENCE

CAPSTONE TECHNOLOGIES

BIM Modeler Architect

 *Riyadh, KSA*

February 2025- Present

- Contributing to Diriyah Gate Development – Jabal Al Qurain Avenue (Qurain Cultural District), a high-profile mixed-use destination integrating retail, F&B, and cultural spaces.
- Developed and managed Revit-based Architectural BIM models (LOD 300–400), ensuring accurate geometry, coordinated data, and construction-ready deliverables.
- Generated complete architectural drawing packages (plans, sections, elevations, detailed drawings) directly from BIM models.
- Delivered detailed architectural components and joinery-level elements, aligned with design intent and technical standards.
- Supported packages comprising 56 retail units and 15 F&B outlets, across multiple building typologies within a pedestrian masterplan.
- Executed BIM coordination with architectural, MEP, and landscape disciplines, contributing to well-integrated and clash-free documentation.
- Interpreted and implemented Najdi architectural guidelines, ensuring consistency with heritage-driven design requirements.
- Maintained model accuracy, data integrity, and documentation consistency across all project stages.
- Supported design development, revisions, and drawing updates, ensuring timely and coordinated deliverables.
- Followed established BIM standards and workflows, contributing to efficient project delivery within a large-scale environment.

ACACIA INTERIOR

Junior Architect

 *Ajman, UAE*

August 2023 - October 2024

- Helped develop and refine design ideas using AutoCAD for spaceplanning and technical drawings.
- Created 3D models in SketchUp to explore interior layouts, materials, and furniture placements.
- Made high-quality renderings with V-Ray, Lumion, and Enscape to support design presentations.
- Assisted in material selection and mood boards, helping define the look and feel of each project.
- Reviewed shop drawings and mock-ups on-site with senior designers before installation.
- Prepared presentation layouts and drawing packages for client meetings and internal reviews.
- Visited project sites with the team to take measurements, photos, and notes for design updates.
- Helped with research on materials, finishes, and furniture, coordinating with suppliers when needed.
- Prepared precise fit-out drawings and shop drawings for partitions, ceilings, custom joinery, and finishes.
- Developed and reviewed cladding shop drawings, including fixing details and interface with structural elements.
- Supported senior designers in organizing samples, catalogs, and drawing files for each project.

- Assisted in concept development, space planning, and material selection, while learning how design ideas are shaped from start to finish.
- Created basic 2D drawings, 3D models, and visual renderings using AutoCAD, SketchUp, and other design tools under team guidance.
- Observed and documented site visits, noting design progress, construction updates, and any deviations from plans.
- Helped prepare mood boards, sample selections, and client presentation materials, gaining experience in visual storytelling.
- Supported the design team by organizing project files, reference images, and material libraries.
- Participated in team meetings and brainstorming sessions, observing how ideas evolve and design decisions are made.
- Reviewed subcontractor shop drawings for accuracy and adherence to design specifications.
- Monitored site progress and prepared snag lists to ensure quality control before handover.
- Ensured cladding and fit-out components met safety, durability, and weatherproofing standards.

KEY COMPETENCIES

- Design Development
- Space Planning Technical
- Drawing & Drafting 3D
- Modeling & Visualization
- Material & Finish Selection
- Furniture & Joinery
- Detailing Construction
- Knowledge Coordination with Teams Client
- Communication
- Presentation & Documentation Time
- Management Learning & Adaptability

EDUCATION & CERTIFICATIONS

Bachelor of Architecture

Jawaharlal Nehru Architecture and Fine Arts University

Secondary School of Education

International Indian School, Jeddah, KSA
