PROFILE SUMMARY

A high-performing civil engineer, project manager, construction manager, and industry expert **with over 24 years of stellar experience in leading** the construction of oil & gas, pipeline, and infrastructure projects. Throughout my career, delivered several landmark projects on time and within budget while ensuring the highest standards of workmanship and engineering practices.

- **Successfully managed and led challenging constructions projects** and equipped with a comprehensive understanding of construction methodologies, industry regulations, and best practices, thriving in dynamic environments where precision, efficiency, and safety are paramount.
- **Respected for delivering the project in line with the Construction Program** and the commercial forecast while ensuring Cost, time, and HSE targets and KPIs are achieved.
- **Build a sound framework for executing multi-million-dollar construction projects** - administering massive budgets, negotiating contracts, controlling expenses, navigating project risks, and boosting efficiency.
- **Leveraged expertise to anticipate challenges**, mitigate risks, and drive construction success from conception to completion.
- **History of handling some of the region's most demanding construction projects** as Construction Manager/Senior Civil Engineer in KOC, KNP, and MPW Projects.
- **Known for bringing the best out of teams of talented professionals** and leading programs that increase stakeholder satisfaction and ensure their alignment with the organizational strategy.

CORE SKILLS

- Project Planning Excellence
- Construction/Site management
- Civil Engineering
- Infrastructure Works
- Coordinating Engineering Resources
- Resource Allocation & Optimization
- Technical Understanding
- Change Management
- Project Close-out
- Quality Management & HSE
- Cost, time & Budget Management
- Attention to detail
- Cost Engineering
- Project Documentation
- Contractual & Client Negotiations
- Communication Skills
- Quick Problem Resolution
- Process improvement
- Liaison and Coordination
- Team Building & Leadership

PROFESSIONAL EXPERIENCE

Lead Construction Engineer of Civil Work (Jun 2022 – Present)

JEREH OIL & Gas Engineering corporation

Key Projects to Credit:

- Project: **Jurassic Production Facility-5(JPF-5) North Kuwait | Owner KOC**

Key Responsibilities:

- Managing complex multi-disciplinary projects for construction and maintenance of structures, facilities, and systems with an emphasis on continuous process improvement and on-time project delivery in alignment with the overall project schedule and within defined budgets.
- Developing aggressive plans, organizing/planning/prioritizing work, streamlining documentation processes, and contributing to technical submittal.
- Working with key stakeholders to define requirements and delivery milestones; offering vital inputs in reviewing information from materials, resources and site to identify and resolve issues promptly.
- Driving impressive improvements in proposed plans, implementing value engineering and inspecting equipment/structures/material, and improving quality of works as per the specifications.
- Providing essential leadership in collecting and disbursing project information; identifying issues and addressing them and providing corrective actions
- Resolving numerous project issues including resource shortages, tactical matters, scope creep, and project and stakeholder needs while supporting all project and strategic growth plans.
- Managing project and ensuring fulfilment of project objectives (full respect of Contract, Quality, Safety, and Environment requirements, within the Specific Time Schedule and Cost).
- Leading the project engineering functions and essayed a stellar role effectively handling the following tasks:
 - Supervising personnel, technical accuracy, quality of work, and adherence to budgets and schedules
 - Addressing project issues, adjusting the project scope as needed to provide the most value to the company
 - Holding merit for controlling project changes to minimize threats and ensure project success is not affected
 - Maintaining immaculate project documentation and overseeing data including entering, transcribing, recording, storing, or maintaining information in written or electronic form for future referral.
 - Fostering effective communication and coordination with project teams and stakeholders and resolving complaints/disputes/grievances and conflicts, or otherwise negotiating.

- Administering day-to-day activities and overseeing quantifiable parameters for estimating sizes, distances, and quantities; determining time, costs, resources, or materials needed

Construction Manager (Jan 2018 – May 2022)

United Gulf Construction Company

Key Projects to Credit:

- Project: **GC-32 (new gathering center at SEK) | Owner/Contractor: KOC/ Petrofac**

Key Responsibilities:

- Spearheaded construction sites for large-scale projects; scheduled, coordinated, and monitored the assigned projects and optimized project timelines, and tracked project progress & performance.
- Expertise in managing end-to-end project activities right from estimating project requirements and detailing specifications and managing project activities until close-out and handover.
- Reviewing technical submittal for materials, events, or the environment monitoring the quality of works as per the specifications, and maintaining the strictest alignment with applicable quality policies, performance standards, and specifications.
- Coordinated with the site/project/client teams to understand their needs and observed a policy of open communication to reduce risk significantly and flawless execution.
- Mobilized resources at the site to meet predefined deadlines and coordinated with supervisors, peers, or subordinates to achieve day-to-day performance objectives.
- Oversaw elements critical to determine project progress/ status, computed work completed to ascertain cost incurred, and processed monthly payments as per contract.
- Generated an array of technical reports during various stages of the project life-cycle for strategic analysis and cost optimization.

Construction Manager (Jan 2017- Dec 2017)

Jazeera Industrial Projects General Trading & Contracting Co

Key Projects to Credit:

- Project: **LFHO | Project Owner/Contractor: KOC/ Petrofac**

Key Responsibilities:

- Characterized by steadily increasing responsibilities in management for all phases of the project, specifically, scope, technical, schedule, and coordination, for construction and maintenance of structures, facilities, and systems.
- Provided technical, managerial, and engineering oversight to keep the project aligned with safety rules
- Spearheaded the project planning and scheduling, prepared project brief and project quality plan, allocated resources to project phases, used top-quality materials for construction projects, while providing technical direction, and ensured compliance with laws, regulations, and standards.
- Drove project excellence by providing extensive technical support and engineering brilliance to enhance project value by studying the project plans, auditing project programs, identifying risks, and monitoring progress.
- Oversaw the successful delivery of projects to scope, target cost, quality, safety, and completion, reporting the most accurate information and handling project conflicts/claims effectively.
- Offered technical support in preparing submittal (materials, events, or the environment) and achieving required quality for ensuring the project runs on time/budget and is safe to work on.

Sr. Site Engineer (Mar 2013– Dec 2016)

Project Engineer (Jan 2011 – Feb 2013)

Sayed. Hameed Behbehani Co. W.L.L.

Key Projects to Credit:

- Project: **New Ahmadi Hospital Project | Client: KNPC**
- Project: **LPG Train-4 in MAA | Client: KNPC**

Accomplishments & Responsibilities:

- Commanded the full scope of construction projects -developing plans, identifying requirements, making decisions, solving problems, and monitoring processes/materials/surroundings; supervising technical professionals, workers, and sub-contractors, managing risks, and obtaining equipment/materials.
- Coordinated efforts for day-to-day operations for ongoing projects; formulated work plan in accordance with requirements, good construction practice, and assigned resources (Manpower, Materials, and Equipment) based on quantity/volume of work.
- Offered technical support in verifying drawings and specifications as per client specification; ascertained optimal resource utilization, address all construction issues and attain established and maximum productivity
- Fostered effective communication and coordination with internal project teams and externally with clients, third-party agencies, suppliers, and subcontractors.
- Participated in periodic review meetings to discuss various problems that arose during the project execution program. representing the organization to customers, the public, government, and other external sources
- Prepared and submitted various project tracking reports to senior management including project schedules and resources, and cost reports for review and action.

Construction Manager (May 2007 – Nov 2010)

Bayadera Al Deira Gen.Trad.Co.

Key Projects to Credit:

- Project: **Crude Export Facilities. NTF, STF & MAA (KOC) Project** | Main Contractor: **Hyundai Heavy Industries Co. Ltd**

Accomplishments & Responsibilities:

- Developed project objectives by understanding project proposals and plans, and collaborating with management to define clear objectives for the project.
- Determined project responsibilities for various phases and elements of the project and assigned personnel and simultaneously provided inputs in evaluating bids from contractors to select the most suitable for the project.
- Adhered product design, customer requirements, and performance standards to establish project specifications. including technical studies and preparing cost estimates.
- Analyzed the project plan and specifications to create a detailed project schedule, calculated time requirements, and sequencing project elements for efficient execution. Monitored project progress, coordinated activities, and resolved any issues/delays to ensure that the project stays on schedule.
- Analyzed design, specifications, and changes to the plan/schedule, and addressed any deviations from the original plan. Approved expenditures and managing contractor contracts to ensure that the project stays within budget.
- Generated an array of project information and trends to provide regular updates on the project's progress. Enforced procedures, rules, and regulations to ensure a safe and productive work environment for all personnel involved in the project.
- Designed computer programs, entered data, and backed up project-related information to maintain an organized and accessible project database.
- Ensured compliance with federal and state regulations to uphold the reputation of both the product and the company involved in the project.
- Collaborated with team members and stakeholders to achieve project goals and objectives effectively.

Previous Experiences:

- May 2006 – May 2007: Civil. Engineer, Asian Engineering
Key Projects to Credit:
Kuwait Municipality Tower
- Apr 2003 – Apr 2006: Site Engineer, Ahmadiyah Contracting & Trading Co
Key Projects to Credit:
 - J.W.Merit Hotel Al Arraya Center

EDUCATION

Bachelor of CIVIL Engineering from University of Engineering Technology, Lahore, Pakistan

Professional Development:

- **PMP Certified, Project Management profession**

Technical Competencies:

- AutoCAD, Windows XP, Word, Excel, PowerPoint, Photoshop, Graphics & Multimedia
