**EDUCATION**  
**Batangas State University**  
2019 - 2023  
Bachelor of Industrial Technology

**LICENSE**  
Driving License - Philippines

- SKILLS**
- Teamwork
  - Efficiency
  - Mechanical Knowledge
  - Troubleshooting Knowledge
  - Repair and Maintenance
  - Fabrication
  - Computer Literacy
  - Time-management
  - Detailed oriented
  - Accuracy
  - Safety

**SUMMARY**  
Experienced in technical operations and maintenance with a focus on precision machining, equipment troubleshooting, and project supervision. Skilled in data analysis and reporting, operating CNC, milling machines, performing electrical motor inspections and repairs in a geothermal power plant. Adept at diagnosing mechanical and electrical issues, managing quality control, ensuring safety compliance, and coordinating with clients and team members to meet project requirements.

- PROFESSIONAL EXPERIENCE**
- ENGINEER COORDINATOR**  
Tianlong Cylinder Inc.  
*Laguna, Philippines*  
*January 2025 - May 2025*
- Manage communication between design engineers, assembly teams, and suppliers to ensure all parts and components are available and meet quality requirements.
  - Monitor assembly progress, troubleshoot issues, and implement corrective actions to minimize delays.
  - Prepare and maintain documentation related to machine assembly, including assembly reports and inspection records.
  - Ensure compliance with safety protocols and quality standards during the assembly process.
  - Collaborate with quality control to conduct inspections and tests on assembled machinery to verify functionality and performance.

- SITE ENGINEER COORDINATOR**  
Magnificon RMC  
*Laguna, Philippines*  
*November 2023 - June 2024*
- Monitoring pouring activities at all sites to ensure quality control, safety compliance, and adherence to project schedules.
  - Supervising personnel, including drivers and quality control (QC) samplers
  - Coordinates with clients to understand and address their project needs.
  - Prepare and analyze data reports from site operations and communicate findings to engineering teams for process improvements.
  - Liaise between clients, contractors, and internal teams to resolve project-related issues and update stakeholders on progress.
