## Summary

---

Electrical Engineer with experience specializing in electrical design, site operations, solar systems maintenance, testing and commissioning, and project management. with strong technical communication skills and a proven track record of delivering high-quality projects. Adept at AutoCad & Revit design, troubleshooting, and regulatory compliance. Holds Saudi Council of Engineers membership. Seeking a challenging Electrical Engineering role in a reputable organization where I can contribute to projects and continue professional growth.

## Projects

---

- Electrical works for Dohat alinile project Khartoum - Sudan  
Supervised electrical operations, securing adherence to project schedules and compliance with quality benchmarks.  
Client: Alrajhi.

## Experience

---

- **City light co** May 2025 -now  
Electrical Engineer  
for unified contract of SEC
- **JTI Sudan (Japan Tobacco International)** Jan 2023 – Feb 2025  
Electrical Engineer
  - Responsible for the Electrical maintenance and Implementation of Machines Safety instructions.
  - Support suppliers to installing and commissioning new machines.
  - Ensure that the machines are running effectively and efficiently.
- **FUHONG CONSTRUCTION, ROADS & BRIDGES ENTERPRISE.** Feb 2021-Dec 2022  
Electrical Engineer (site and technical office)
  - Supervised electrical installations and ensured adherence to international standards.

- Oversaw project execution from planning to final delivery.
- Develop detailed electrical drawings and schematics following project specifications.
- Resolved technical issues and optimized workflow operations.
- Coordinate with various stakeholders to understand project requirements and expectations.

SINE FOR ELECTRICAL & MECHANICAL SOLUTIONS

Jan 2019-Feb 2021

Testing & Commissioning Engineer

- Electrical Power Equipment Testing and Commissioning such as Power Transformers and medium voltage switchgears and low voltage switchgears and cables and Solar Energy.

## Education

---

Sudan University of Science &  
Technology

Dec 2018

B.Sc. of science (Honors) in Electrical  
Engineering (Control).

## Certifications

---

- IOSH Managing Safely  
<https://very.iosh.com/?reference=43395725-01-9L65>

- Google Project Management  
<https://www.coursera.org/account/accomplishments/professional-cert/7272KVUDXHJ>

## Achievements & Awards

---

- Saudi Council of Engineers membership.
- Sudan Engineering Council member.

## Courses

---

EXEMPLAR CENTER FOR ENGINEERING  
TRAINING & CAREER DEVELOPMENT

- Electrical Installations Design for Building & Facilities.
- Electrical Power System Concepts & Technology.

- Electrical Safety.
- Low Voltage Switchgear.
- Electrical Power Equipment Testing & Commissioning.
- Fault Analysis of Current Distribution in Power Transformers & Generators.

## Skills

---

- Electrical Site Supervision.
- Time Management & Prioritization.
- Problem Solving & Critical Thinking.
- Pressure Resilience and Team Collaboration.
- Quick learner, adaptable to new technologies and methods.
- Patient and self-motivated, delivering consistent performance and results.
- Highly organized and accountable, ensuring responsibility for outcomes and deliverables.
- Client Communication & Negotiation.

## Software Skills

---

- Electrical Systems Design Using AutoCAD, Revit, Dialux evo and Etap.
- Microsoft Office.
